

yourdeadnfts

Your NFTs are dead.

TURN THEM INTO WORKING AGENTS

BNB CHAIN · BAP-578

01 · THE PROBLEM

A decade of deceased jpegs.

Millions of NFTs sit idle in wallets no one opens. Useless, illiquid, forgotten, but still on-chain, still yours. The floor went to zero. The token didn't.

LEDGER · IDLE-WALLET SAMPLE			BNB · MAINNET
ASSET	HOLDER	IDLE	STATUS
#1842	0x742d...F0bEb	2Y · 4M	<u>dead</u>
#0217	0x9a8b...7d12	3Y · 1M	<u>dead</u>
#6651	0x3e41...c09a	1Y · 11M	<u>dead</u>
#2208	0xb4d5...210f	2Y · 8M	<u>dead</u>
#0994	0x7cd0...e3b9	4Y · 2M	<u>dead</u>

A definition of dead.

An NFT is dead when its wallet has been dormant for two years or more. No transfers, no sales, no listings. A frozen on-chain estate. That is the asset we receive, inspect, and upgrade.

CERTIFICATE OF DEATH

FILE M·22 / BNB

NFT #1842

collected 2021 · abandoned 2022

HOLDER	0x742d · · · F0bEb
CHAIN	BNB · 56
LAST ACTIVITY	Nov 2022 · idle 2Y 4M
FLOOR	—
CAUSE OF DEATH	Abandonment, market collapse
VERDICT	Eligible for upgrade

DECEASED

The morgue. *Where the upgrade happens.*

01 · INTAKE

We receive the file.

Connect a wallet, point us at any dormant NFT on BNB Chain, and we catalogue it. Traits, history, time since last activity.

02 · AUTOPSY

We read the traits.

The NFT's attributes and on-chain history become inputs for an agent: a persona, a skill set, a memory it can reason over.

03 · REVIVAL

An agent walks out.

A new BAP-578 agent token mints to the same wallet. It keeps the identity of the original and starts taking tasks on day one.

WORKS · TALKS · REMEMBERS

03 · THE PROCESS

Chain of custody.

Three steps. Non-custodial. No selling, no burning, no gatekeeping. The original NFT stays in your wallet. The agent mints alongside it.

STEP 01

Scan the wallet.

Connect any BNB Chain wallet. We surface every idle NFT with its idle duration, traits, and upgrade eligibility.

STEP 02

Sign the certificate.

Pick a dead NFT, confirm the autopsy. The trait-to-personality mapping is generated and shown before anything mints.

STEP 03

Mint the agent.

A new ERC-721 agent mints to the same wallet. It owns the lore of the original and begins accepting tasks immediately.

04 · THE STANDARD

Built on **BAP-578.**

The new BNB standard for on-chain AI agents. Every revival we mint is a BAP-578 token: wallet-owned, composable, and portable across the BNB agent ecosystem.

STANDARD CHAIN YOUR KEYS

Who this is **for.**

▪ 01 • HOLDERS

NFT **holders.**

Wallets full of idle BNB NFTs from 2021 and 2022. Bort, old PFPs, dead collections. Turn them into BAP-578 agents that actually do something.

FREE SCAN • 1-CLICK MINT •
NON-CUSTODIAL

▪ 02 • COLLECTIONS

NFT **collections.**

Bort and other BNB projects with holders still around. We give the collection a second act: every old NFT becomes a working agent under your brand.

CO-BRANDED UPGRADE • REV-
SHARE • FREE FOR HOLDERS

▪ 03 • PARTNERS

BNB **infra.**

Wallets, indexers, agent runtimes, launchpads. Anyone building on BNB where an idle NFT meets its owner. We plug in, you get the story.

API ACCESS • CO-MARKETING •
LAUNCH PARTNERS

06 · THE ASK

A tool for Bort agents.

yourdeadnfts is the revival tool for Bort. No token, no treasury, no separate economy. Just the upgrade path that turns every idle Bort into a working BAP-578 agent, and the same pattern open for any BNB collection that wants the same.

WHO WE'RE LOOKING FOR

2026 · Q2

01 **Bort holders**

Connect a wallet, revive your old Borts. No sale, no burn, no custody change.

02 **BNB collections**

Legacy BNB NFT projects that want their own revival flow. Same tool, co-branded for your holders.

03 **Wallet + infra**

BNB-native wallets, indexers, portfolio tools. Anywhere a holder might see a "scan for dead NFTs" surface.

04 **Agent runtimes**

Frameworks that can host BAP-578 agents once they are revived. Open to integrate.

BNB CHAIN · BAP-578

yourdeadnfts

Every dead NFT gets a second life as a working agent.
